# CYBERSECURITY HUB DARMSTADT

Darmstadt features a high concentration of universities as well as a healthy digital ecosystem. In a national competition held by Bitkom, Darmstadt was honoured with the title of Digitale Stadt or 'Digital City' for 2017. The Cybersecurity Digital Hub Darmstadt builds upon these locally founded strengths. It connects players from established companies, the research sector and the entrepreneurial scene, who work together to develop innovative security products and infrastructures before launching these onto the market.
