

LOGISTICS HUB DORTMUND

The former industrial metropolis of Dortmund is transforming itself into one of the most important science and technology locations in Germany. The local logistics sector in particular is taking advantage of the opportunities offered by intelligent networking of industry, trade and production. The Digital Hub Logistics Dortmund is supporting this digital transformation. It promotes special digital teams within established companies that deal with innovations outside of day-to-day business. New products and services are developed and tested in experimental areas under realistic conditions. Founders,

companies and the science sector can work together to generate ideas and scale up. This way, new innovations can be explored away from the usual product development processes, whilst still within the company.

Top Programmes & Opportunities:

1. Start-in Factory

The start-in innovation concept is a new approach for bringing digital transformation processes in mature companies to a successful conclusion more quickly – whether it's digitising products, developing digital business models or scouting for strategic partners.

Target group: SME

2. Digital Logistics Award

The Digital Logistics Award is one of the highest endowed awards in the logistics start-up scene. With this award, the Digital Hub Logistics wants to recognise, honour and promote creative business solutions for the digital working world in logistics.

Target group: Start-ups

3. Innovation Check

The Innovation Check covers the areas of innovation culture, organisational structure, idea generation and implementation. It helps companies to self-assess their innovative strength and provides recommendations for implementation and support options for their innovation projects.

Target group: SME, Corporates
