

SMART INFRASTRUCTURE HUB LEIPZIG

Leipzig has steadily built its reputation as an attractive, aspiring location for start-ups. Several research institutions covering a wide range of research projects serve as the driving force behind the Digital Hub. At the same time, the site is home to strong businesses that are – often in collaboration with start-ups – increasingly opening up to innovation. The energy, smart city and e-health sectors are particular focal points in Leipzig, allowing the Hub to connect the scientific community, businesses and start-ups. An accelerator

programme focussing on smart infrastructure, various regional cluster organisations, numerous events and innovation formats all play a supporting role in enabling this exchange.
