

MOBILITY HUB MUNICH

At the Digital Hub Mobility, partners from the established industries join forces with start-ups and city municipal councils to develop new mobility solutions. Through the 'Citizen Mobility' format, the Digital Hub has created an agile implementation platform to strengthen collaboration between these actors. Additionally, at the 'Digital Product School', cross-functional teams build digital products that solve mobility problems. The Digital Hub is a driving force behind mobility projects and organises regular events to foster networking in the mobility scene.

Top Programmes & Opportunities:

1. Citizen Mobility

Citizen Mobility is a six-month programme in which companies, start-ups and municipalities work together to develop prototype, innovative solutions for the urban mobility of tomorrow.

Target group: *Start-ups, Corporates, Municipalities, Citizens, Research Institutions, Local Politics, Talents*

2. Digital Product School

At the Digital Product School cross-functional product teams, i.e. product managers, interaction designers, software engineers, and artificial intelligence engineers work together in a team, explore and understand user problems and solve them by building a digital product. The Agile team coaches support them to perform as a team. The product marketing and communications managers work in their own teams on specific communication challenges.

Target group: *Corporates, Talents, Municipalities*

3. Munich Urban Colab

At the Munich Urban Colab, start-ups, established companies, voices from science, fresh talent and the City of Munich are developing and testing innovative concepts together with citizens. There are over 11,000 square metres of office space, co-working spaces, event and seminar rooms, living labs and a high-tech prototype workshop.

Target group: *Corporates, Municipalities, Research Institutions*
