

DIGITAL HEALTH HUB ERLANGEN

The metropolitan region around Erlangen is characterized by a strong network of business enterprises and excellent research institutions in the healthcare sector. The location was named the national top cluster in the field of medical technology by the German Federal Ministry of Education and Research and therefore provides ideal conditions for the rapid development of products, processes, and services.

The Digital Health Hub Erlangen builds upon these structures already in place and, by consistently carrying out digitization measures, works on current and future challenges in the healthcare industry. The aim is the continued improvement of healthcare quality through the stimulation of growth in the healthcare market. Furthermore, the focus is on the continuous internationalization of the Hub and its community.

Top Programs & Opportunities

1. Medical Valley Award

The Medical Valley Award is a pre-founding project of the Bavarian State Ministry of Economic Affairs, Regional Development, and Energy. It is aimed at academic research projects with spin-off potential in an early project phase.

Target group: Start-ups

2. Start-up Consulting

Since 2003, start-ups in the field of healthcare and medical technology have been receiving advice. With the know-how and partner network of the Hub, start-ups are helped to obtain important assessments for the design of their business plan, and the certification and reimbursement of their technology.

Target group: Start-ups

3. Market Access

The Hub provides assistance to international companies in entering the German healthcare market by providing essential information to work out tailored expansion plans including design for clinical studies, sales strategy, and access to funding.

Target group: Start-ups
